SYNTHESIS OF PEPTOID
SUBSTITUTED AZOLE
COMPOUNDS

Patent No. 6,946,562

Issued 09-20-2005

Commissioner for Patents
P.O. Box 1450
Alexandria, VA. 22313-1450

Sir:

Assignee: Eastman Kodak Company

I hereby certify that this correspondence is being
deposited today with the United States Postal Service as
first class mail in an envelope addressed to Commissioner
For Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

OCT 19 2005**REQUEST FOR CERTIFICATE OF CORRECTION**
UNDER RULE 322

Request is hereby made on behalf of the inventor and assignee that
hereinafter-identified mistakes in the above-identified patent can be corrected by
issuance of a Certificate of Correction. Such mistakes occurred in some instances
as a result of the fault of the Patent Office.

The location of such mistakes in the patent, and of the
corresponding correct language in the application, are as follows:

Patent Reference
Claim 1, column 42Amendment filed January 14, 2005
Claim 1, line 5 of amended claim

The Director is hereby authorized to charge any fees in connection
with this communication to Eastman Kodak Company Deposit Account No.
05-0225.

A duplicate copy of this letter is enclosed.

Respectfully submitted,

Attorney for Patentee(s)
Registration No. 25,518Arthur E. Kluegel/dlm
Telephone: 585-477-2625
Facsimile: 585-477-1148

If the Examiner is unable to reach the Patentee(s) Attorney at the telephone number provided, the Examiner
is requested to communicate with Eastman Kodak Company Patent Operations at (585) 477-4656.

UNITED STATES PATENT AND TRADEMARK OFFICE

CERTIFICATE OF CORRECTION

Patent No.: 6,946,562

Page 1 of 2

Issued: September 20, 2005

Inventor(s): Donald R. Diehl
Robert J. Niger
Hans F. Schmitthenner
William J. Sonnefeld
Richard P. Dunlap

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

At Col. 42, line 59 insert -- a is 0-4-- in place of "is 0-1".

Claim 1 is amended to read as follows:

1. A process for the preparation of a peptoid substituted azole compound represented by formula I

I

OCT 19 2005

each R1 represents an independently selected substituent group selected from the group consisting of allyl, vinyl, propargyl, alkyl, aryl, alkoxy, amino, anilino, alkoxycarbonyl, carbamoyl, acyl, cyano, sulfone, and sulfonamido groups and a is 0-4;

each R2 represents an independently selected substituent group selected from the group consisting of alkyl, aryl, and 1-(3-propyl)-2-pyrrolidinone groups;

each R3 represents hydrogen or an independently selected substituent group selected from the group consisting of allyl, vinyl, propargyl alkyl, aryl, alkoxy, amino, anilino, alkoxycarbonyl, carbamoyl, acyl, cyano, sulfone, and sulfonamide groups;

L represents a single bond or a chain of atoms containing one or more of carbon, nitrogen, oxygen, and sulfur atoms;

Y is carbon, and Y' and Y'' are each nitrogen;

X is a hydrogen atom, a halogen atom, a carboxy group, an acyl group, or a group bonded to the coupling position through an oxygen, nitrogen, or sulfur atom, and

Z is 1-6.

comprising

(I) reacting

(i) an amino functionalized pyrazolo[5,1-c]-1,2,4-triazole compound with

(ii) a resin bound peptoid oligomer bearing a terminal halogen substituent followed by

(II) cleavage of the resultant product from the resin surface using a fluorinated organic acid in an inert solvent.
